

CLAIM LISTING

1. (currently amended) In a web based imaging environment, from a user's client browser, a method of providing the ability to specify a charge-back account, said method comprising the steps of:

accessing a destination service representing a production device;

downloading content from said destination service into said client browser;

retrieving said user's production image data;

selecting production options for a print job to print ~~processing according to~~ said user's image ~~production~~ data using said production device; and

providing said user the ability to specify a charge-back account ID for processing said print job ~~processing according to said user's production data~~ using said production device.

2. (original) The method of claim 1 further comprising displaying a menu including a list of production options for processing according to said user's production data using said production device, said displayed list including a list of charge-back account IDS.

3. (original) The method of claim 2 wherein said displayed list of charge-back account IDS includes only account IDS that are individually customized to said user.

4. (original) The method of claim 1 further comprising calculating a cost breakdown for said processing according to said user's production data using said production device.

5. (original) The method of claim 4 wherein said cost breakdown is calculated prospectively during said steps of selecting and providing.

6. (original) The method of claim 5 wherein said cost breakdown is displayed dynamically during said steps of selecting and providing.

*Response To Office Action  
Serial No. 10/007,254*

-2-

7. (original) The method of claim 5 further comprising analyzing and reporting resources required to execute said processing according to said user's production data using said production device.

8. (original) The method of claim 1 further comprising specifying a charge-back account ID.

9. (original) The method of claim 8 wherein a list of default production options associated with said specified charge-back account ID is displayed.

10. (original) The method of claim 8 further comprising:  
transmitting said user's production data using said production device to said destination service;

processing according to said user's production data using said production device in accordance with said selected production options;

calculating the cost of said processing according to said user's production data to be charged back; and

charging back said processing according to said user's production data to said specified charge-back account ID.

11. (original) The method of claim 10 wherein said charging back occurs after said processing is completed.

12. (original) The method of claim 1 wherein said processing does not proceed if a chargeback account ID is not specified.

13. (original) The method of claim 1 wherein only specific production operations of said processing do not proceed if a charge-back account ID is not specified.

14. (original) The method of claim 1 wherein said user's production data comprises imaging data.

*Response To Office Action*  
*Serial No. 10/007,254*

-3-

15. (original) The method of claim 14 wherein said imaging data is retrieved from said user's identity.

16. (original) The method of claim 14 wherein said imaging data is retrieved from a hard disk local to said user's client browser.

17. (original) The method of claim 1 wherein said production device comprises a printer.

18. (original) The method of claim 1 wherein said destination service is remote from said client browser.

19. (currently amended) In a web based imaging environment, a destination service operable to:

- represent a production device;
- download content into a user's client browser;
- retrieve production image data associated with said user's client browser;
- under interactive control of said user's client browser via said content, specify production options for a print job to print the image data processing using said production device ~~according to said production data~~;
- specify a charge-back account ID for said print job processing;
- direct said production device to process said print job in accordance with said selected production options;
- calculate the cost of said processing to be charged back; and
- charge back said processing to said specified charge-back account ID.

20. (original) The destination service of claim 19 further operable to display at said client browser via said downloaded content a menu including a selection of production options and charge-back account IDS associated with said production device.

*Response To Office Action*  
*Serial No.10/007,254*

-4-

21. (original) The destination service of claim 20 wherein said displayed list includes only account IDS that are individually customized to said user.

22. (original) The destination service of claim 19 further operable to calculate a cost breakdown estimate prior to directing said production device to process in accordance with said selected production options.

23. (original) The destination service of claim 22 further operable to display said cost breakdown dynamically.

24. (original) The destination service of claim 19 operable to retrieve said production data from said user's identity.

25. (original) The destination service of claim 19 operable to retrieve said production data from a hard disk local to said user's client browser.

26. (original) The destination service of claim 19 wherein said production data comprises imaging data.

27. (original) The destination service of claim 19 wherein said production device comprises a printer.

28. (currently amended) In a web based imaging environment, a system providing the ability to specify a charge-back account, said system comprising:  
a user's client browser operable to manage said user's production data;  
a destination service representing a production device, said destination service accessible from said user's client browser and operable to retrieve said user's image data, to download content into said user's browser and, under interactive control of said user's client browser, to specify production options for a print job to print said user's image data and a charge-back account ID for processing said print job using said production device ~~according to said user's production data.~~

*Response To Office Action*  
*Serial No. 10/007,254*

-5-

29. (original) The system of claim 28 wherein said destination service is further operable to display at said user's client browser via said downloaded content a list of said production options and charge-back accounts.

30. (original) The system of claim 28 wherein said destination service is further operable to calculate and display dynamically a cost breakdown estimate to process using said production device according to said user's production data and according to said specified production options.
